

Terms of membership - Catch Collective Hal16

ACCESS AND OPENING HOURS

A membership gives access to the workshop and all equipment and facilities during the hours that you have sign-up for. Some machines require that you have taken a "driver's license" before you can use them on their own. Courses held regularly.

USE

When a workshop is shared with many users all love to invent and experiment puts this greater pressure on machines than normal. Therefore, a machine sometimes been down and we can not guarantee a 100% uptime. Of course we will always fix a problem as fast as we can and give the message to members of the crash.

ACCIDENTS

If an accident occurs and you get damaged a machine, please let us know immediately so that we can repair the damage as soon as possible.

CNC milling machine: It costs a new MDF plus 600kr. cutting down on the table.

Damage forsaken by improper or unsafe use of machinery/tools will be billed. Costs depend on machine/injury. Make sure that you have the proper insurance.

Some machines are managed by the so-called "one-sheet policy". This means that you must cut one plate on the machine and then it's on to the next in the queue. We are a joint workshop. Give space if others are pressed and you can wait a bit. It's good workshop-karma.

Parts of the workshop may at certain times be reserved for organized courses, workshops, cleaning, maintenance etc. We will try to inform about "closing" in good time.

Materials, projects, etc.. Do not leave this at the workshop after you have gone. We offer different types of storage for your needs, as an acquisition for membership.

The workshop does not replace lost effects, but your contents insurance should cover you in. Contact your insurance company if you have any doubts.

Stray materials, projects, etc.. are marked with a lost property-slip and deposited after 7 days.

CLEANING

Clean your workstation after use. (Can't believe I need to write this...) Put your stuff together at the same place, så that we don't have unknown projects all over the workshop.

WASTE

At the moment, we have two containers - both are labelled with the type of waste which goes in. Please respect this.

SAFETY

Do not use machines you are not familiar or comfortable with. It can be dangerous and 3D printers can not (yet) make you a new finger.

We strongly recommend that you take out accident insurance so you're covered should an accident occurs. In addition, all safety rules and measures for personal protection are respected.

TERMINATION OF MEMBERSHIP

There is no binding period on a membership. Termination or changes to your membership must be sent to us in writing to rasmus@betalab.dk latest at the 7th the month before you want to stop the membership. Unless something else is agreed upon when starting your membership.

GUESTS

Guests are allowed as long as they do not actively take part in a work a.k.a "hanging out". The member is responsible for his guest.

THE MOST IMPORTANT

Have fun and learn something new :)
